

Available as a stand-alone portal solution and as an integrated module for the aBILLity platform, our award winning WLR3 (Wholesale Line Rental 3) software is a fully managed, carrier grade WLR3 gateway offering resilience, reliability and performance. It gives you complete control over your customers' WLR assets, service provisioning and fault management.

User experience

Our WLR3 solution features an intuitive, web based, user interface. This has been designed to maximise productivity and enables you to place orders much more efficiently than most other wizard based solutions.

Where possible, we have translated the data which the EMP (Equivalent Management Platform) returns to provide you with a more meaningful experience.

aBILLity integration

Although our WLR3 portal is available as a stand-alone solution, it really comes into its own when integrated with our aBILLity billing platform. This gives significant business benefits in terms of reduced data entry, faster order processing, extra validation, and reduced errors.

By integrating with aBILLity's LineGuard fraud management module, it can also be configured to automatically block lines if fraud activity is detected. End-user customers are also able to log faults via the Web aBILLity Pro portal.

Complete control

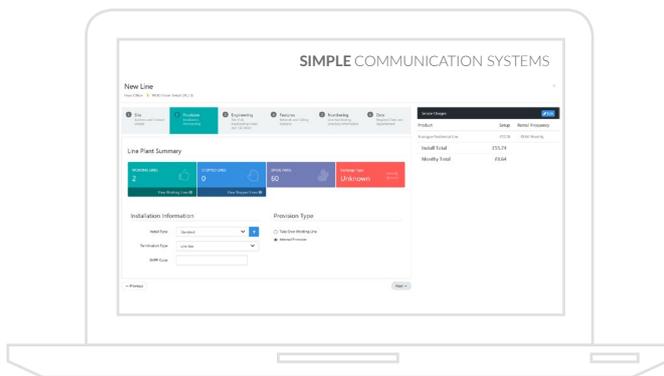

On data entry, we have added additional validation to ensure that orders are placed correctly and rejections are minimised. The system will also communicate with other carriers to place CPS and IDA orders.

WLR3 also enables additional automation of processes such as fraud detection/management where WLR3 can be used to temporarily block lines.

- ✓ Validation of orders to reduce errors
- ✓ Apply limits to excess charges
- ✓ Management reporting
- ✓ Pre-qualify orders/check availability
- ✓ Take lines out of service for credit control

White-labelled

Our WLR3 Portal is ideal if you onward sell WLR to dealers and resellers. Multi-level access rights mean you can restrict access to certain functions. You can also restrict the number of lines a reseller can order to reduce your credit exposure.

The portal can be fully customised with your branding and colour scheme. Additionally, it can be separately branded for your resellers.

Development & support

Union Street's WLR3 solution is the culmination of many years of development effort coupled with the feedback and practical requirements from our substantial customer base. We have a proven track record in delivering new functionality and benefits as soon as they become available.

In addition to our policy of continuous development, we offer a range of support services to ensure that you leverage the maximum benefit from WLR3. This includes initial consultancy, service establishment, training and ongoing remote support.
